

The nutrition information provided has been calculated using multiple online and application resources. This table data is made with the purpose to provide an accurate and complete overview of the nutritional values of each individual cookie; however, these values may have some variations due to cookie quantities, ingredients, and baking procedures during production. Because of this these numbers shown can be considered estimations. The % Daily Value (DV) tells you how much a nutrient in a serving of food contributes to a daily diet. 2,000 calories a day is used for general nutrition advice.
